March 13, 2002

TO WHOM IT MAY CONCERN:

Transgenic corn commercially produced in the United States has completed the necessary review under the U.S. regulatory process for determining the safety of new agricultural biotechnology products. This well coordinated regulatory process sets U.S. standards for human, animal, and plant health, and environmental safety. The transgenic corn used for domestic purposes is the same as those used for export.

A handwritten signature in black ink that reads "David R. Shipman". The signature is written in a cursive, flowing style.

David R. Shipman
Acting Administrator
